

# STXe

## Digital Exciter / Transmitter

### BE's Next Great Exciter & Transmitter

- Unparalleled audio performance
- Standard in BE's S and T Series FM transmitters
- Range in power from 5W to 550W
- Multiple program input with silent sense and audio failover
- Built in RDS Generator powered by theradioexperience
- IP connectivity with superior GUI for anytime, anywhere access
- FSK-ID built-in for translator applications
- Built-in audio delay for synchronous FM systems

### Continuing the Tradition

BE exciters have legendary quality and performance, beginning with the FX 30 and continuing today with the the STXe digital exciters. For more than a decade, over 500 exciters per year have been purchased by either new or existing radio stations that desire the best sounding FM transmission. BE exciter's audio quality is simply the best.

Continuing the tradition is the new line of STXe Digital Exciters. The STXe line of exciters provide audio performance equivalent to the FXi Series, but in a smaller package and with a smaller price.

With the addition of VPe, Vector Power Enhancement, this new exciter can also operate in HD Radio or DRM+ applications, providing the ability to be used in elevated HD level applications or in DRM+ installations that desire a FM analog and DRM+ transmission from a single transmitter. With the STXe Exciters line, you choose your digital standard and the STXe is ready for you.

#### STXe Exciter/Transmitter

STXe 60	5W to 66W
STXe 500	25W to 550W

## The Brains of the STXe

The STXe is truly a revolutionary new design. The new exciter is designed with the controller built-in. This new digital exciter includes top of the line audio specifications rivaling those of the legendary BE FXi series of exciters. The STXe is IP connectible and includes support of SNMP Level 3 for the best in communication and security if SNMP is your desired method of remote communications.

## New Enhanced GUI

Standard with the STXe Exciter line is an updated GUI. If your site has IP connectivity, you can access all important parameters on your laptop, tablet, or smart phone any place, any time.

Broadcast Electronics (BE) offers studio automation and complete RF systems for radio. BE manufactures AM, FM and HD Radio transmitters and studio systems for managing audio programming and automating radio text as well as web interactive tools for today's mobile and social media savvy listener.
